

TRAX[®] Smart Restroom

- ✓ Utilizes Infax TRAX[®] sensors to monitor passenger throughput in each restroom location
- ✓ Uses Smart Locks to notify passengers of an occupied or vacant stall
- ✓ Automatically alerts janitorial staff once a specific restroom's set threshold is met
- ✓ Receive passenger feedback on restroom cleanliness and experience using interactive surveys near restroom locations

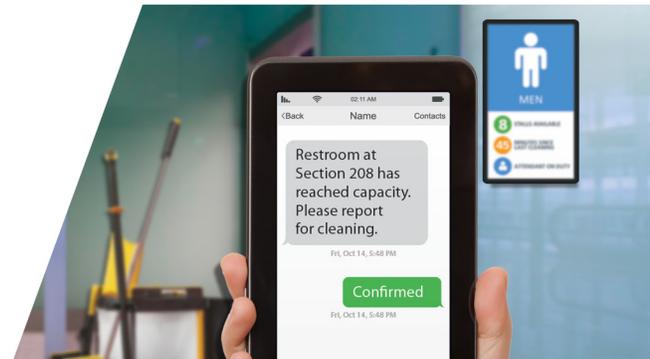

Smart Restroom

LEADER IN INNOVATIVE SOLUTIONS

The Infax Smart Restroom solution turns airport restrooms into intelligent data-collecting environments that improve the overall passenger experience. As a division of the Infax TRAX[®] solution, Smart Restroom uses TRAX sensors to monitor passenger throughput into individual airport restrooms. Once a restroom's set threshold is met, Smart Restroom automatically alerts the appropriate janitorial staff that it needs cleaning.

Smart Restroom uses a variety of technologies to streamline restroom operations. In addition to counting throughput with TRAX sensors, airports can passively track janitorial staff. This allows airport authorities to receive data on which staff member cleaned which restroom, and at what time. Digital signs can also be placed outside of each restroom to show passengers how many stalls are vacant and when it was last cleaned.

To complete the passenger experience, interactive survey tablets are placed near all restroom locations for passengers to use after exiting the restroom. These surveys collect data on restroom cleanliness and passenger experience, which airports can leverage to improve operational efficiency.

FEATURES

-  Throughput monitoring
-  Predictive passenger analytics based on flight information
-  Automatic alerts sent to janitorial staff when cleaning is needed
-  Occupancy analytics and customer experience survey data
-  Passively track janitorial staff
-  Dashboard analytics and "last cleaned" data

INFAX, INC., 4250 River Green Parkway Suite D, DULUTH, GA 30096 E: SALES@INFAX.COM F: 770-209-0671

ABOUT INFAX · For more than 45 years, Infax has been helping patrons navigate public spaces. Our systems provide our clients with capabilities to communicate vital information in real time. With thousands of displays nationwide our solutions have become an integral fixture in the judicial, healthcare, and transportation markets. Infax remains committed to being the most reliable and effective solution for information distribution.
